To Whom It May Concern:

On behalf of Bluehouse team, I would like to take this opportunity to thank Mr. Murat Akcael and his team for all the commitment and efforts during the entire collaboration on our award winning Victoria Center and Olympia Tower projects.

Considering the difficulties in both projects, we consider that Specto team demonstrated extreme professionalism and dedication to achieve our common goals. Very restricted site perimeters, continuous high tension during entire project time and strict technical requirements could only be achieved with the assistance of such a committed, experienced and hardworking team.

We would definitely work with Specto in our future projects and highly recommend Specto services to other companies who require qualified and dedicated hands on project and cost managers.

Stefan Oana
